

Giant 'Christmas' Amaryllis brightens a dark February.

Sister's Rodeo – every June since 1940!

Below: April along Rte 26 east of the Cascades Crest.

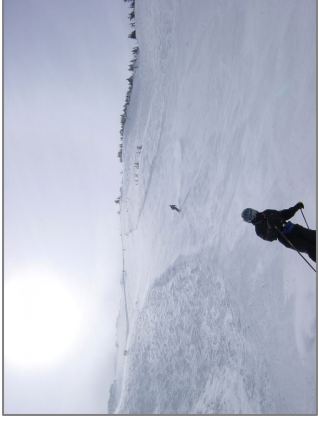

Above: John reaches one million vertical feet in May!

At left: Judy skis Black Diamonds at Mt. Bachelor in January – after her first chemo!

Below: Judy skiing a bit more slowly in March.

Greetings from Judy & John Cushing for 2011

The end of 2010 finds us well – after a busy and harrowing year of Judy's treatments (lumpectomy, chemotherapy, radiation) for early stage breast cancer. We are happy to report an excellent prognosis. As you see from our photos of 2010, the year brought some good adventures and travels. John's big accomplishments for the winter and spring include skiing one million vertical feet and a successful year trading vintage radios, TVs, and Macintoshes (the computers not fruit) on eBay. Both of us played a lot of golf during the summer. Judy returned to teaching at Evergreen in September, this time in the *Master's in Environmental Studies* program. She is specializing in ecology informatics and very much enjoys working with dedicated students and interdisciplinary faculty.

We wish you the best for the coming year.

Judy and John
