

**CALL**  
**XI International Workshop**  
**Energy, environment and sustainable development**  
**CUBASOLAR 2014**

**Renewable sources according to energy demand  
for sustainable development**

The Cuban Society for the Promotion of Renewable Energy and Environmental awareness calls for the eleventh edition of the International Workshop CUBASOLAR 2014, to be held at the Hotel Kawama, Varadero, considered by many the most beautiful beach in Cuba, from 21 to April 25, 2014, year of the twentieth anniversary of CUBASOLAR.

The overall purpose of the meeting is to continue promoting the conscious construction of a sustainable solar energy system in communion with sustainable socio-economic development also based on renewable energy and environmental respect.

Specific objectives of the workshop are: to encourage and promote dialogue and exchange of experiences between experts and stakeholders on these issues and encourage tasks related to renewable energy and sustainable development, with emphasis on proposals that contribute to cooperation and technology transfer capacity creation, into a hierarchy of possible interactions with Latin American and Caribbean countries.

**Thematic Lines**

- Food sovereignty and renewable energy sources.
- Water supply and renewable energy sources.
- Energetic sovereignty, environment and sustainable local development.
- Energetic education, culture and information for sustainable energy.
- Importance of South-South and South-North-South cooperation.

The workshop will be held in plenary through lectures and seminars-panels. During the working sessions, as essential content, integrate the parallel development of optional interactive course on energy and environmental education, and field visits to demonstration facilities, where visitors can learn in situ the impacts, that produce local energy solutions in improving life quality of communities and their role in the success of the programs developed by the Revolution.

As before, will be organized the exhibition CUBASOLAR 2014, demonstration of the potential and achievements in the application of lessons learned with energy and environmental technologies, which will contribute the Cuban and foreign exhibitors who want it.
