

Revegetation of Mount St. Helens

presented by

John Bishop, Ph.D.

Evolutionary Biologist and
Professor
Washington State University

May 8, 2017, 7:00 pm
Experimental Theater in
COM Bldg, rm 124
The Evergreen State College, Olympia

Dr. Bishop has been documenting the emergence of plant and animal communities since the catastrophic eruption of Mount St. Helens. Recent work has demonstrated the importance of insect herbivores in primary succession. He has a Ph.D. from the University of Washington.

This presentation is sponsored by the South Sound Chapter of the Washington Native Plant Society and the Field Plant Taxonomy and Conservation program at The Evergreen State College
